

STORMTEK PILOT PROGRAM PACKAGE

Your community deserves waterways free from trash and other pollutants. StormTek™ connector pipe screen devices are helping a growing number of cities, towns, and neighborhoods prevent trash from getting past their catch basins, where it is easy to capture and dispose of properly.

We want you to have confidence in a decision to choose StormTek. That's why we're making it easy to test a small number of devices in your storm water system environment.

Here is how it works:

We will install 1-10 devices in locations of your choice. We would then monitor those devices over a desired period, ranging from 6 months to 1 year.

Factors we will monitor:

- 1 **Device performance during and after a qualifying rain event.** This includes monitoring 1-2 rain events per pilot term, minimum of 1 qualifying rain event (1/2" of rain or more).
- 2 **Device ability to prevent trash/debris from entering outfall pipe.** SWIMS will collect trash and debris from each catch basin every 6 months and report the amount collected in cubic feet during that period.
- 3 **Ease of maintenance.** We will clean each catch basin and StormTek device once during each 6 month period.
- 4 **Sustained integrity of device.** SWIMS will provide a detailed report and record a video of the device and its condition at the end of the Pilot Program.

Example Pricing (all packages include device, installation, and reporting as described above)

Number of Devices	Term	Pricing
1	6 Months	\$2,200
	1 Year	\$3,400
2	6 Months	\$6,800
	1 Year	\$7,600
10	6 Months	\$13,500
	1 Year	\$15,000
