

5 QUESTIONS TO HELP CHOOSE THE RIGHT TRASH CAPTURE DEVICE

Selecting the right trash capture device can help minimize maintenance costs and avoid future replacement expenses. In order to enjoy smooth operation for many years to come, be sure to get clear answers to the following questions before making a purchase decision.

QUESTION	STORMTEK 100% FULL TRASH CAPTURE DEVICE
Is it approved by the State Water Board?	StormTek has been approved by the California state water board as a 100% full trash capture device.
Will it last?	StormTek devices are exceptionally durable. Units installed for over 15 years are in excellent working condition with many more years of operation expected.
Is there a warranty?	StormTek has an industry-leading 8 year parts and workmanship warranty, when under a maintenance contract with SWIMS.
Is it easy to maintain?	The StormTek device itself requires little to no maintenance. Cleaning is made simple because it is equipped with a hinged lid, allowing access to both sides of the device. It can also be removed entirely with basic tools.
What is the device made of?	First of all, the StormTek device is manufactured strictly in the U.S. It is made of 100% stainless steel, down to the bolts.

StormTek is designed to minimize lifecycle costs, maximize trash capture, and make regulatory compliance easy. For more information, contact SWIMS for a no-obligation consultation.
